**PLAINTIFF’S DISCLOSURE OF EXPERT REPORTS ON THE ISSUE OF  
DAMAGES AS PROVIDED BY FED. R. CIV. P. RULE 26(a)(2)(B)**

COMES NOW, **SCOTT VINCENT**, Plaintiff herein, and attaches hereto the reports of Kathy W. Willard, M.Ed., CRC, CDMS, CCM, CLCP, VE, (Exhibit “A”) and Robert D. Coston, Ph.D., (Exhibit “B”) as provided by Rule 26(a)(2)(B) of the Federal Rules of Civil Procedure within the time allowed by the Court.

Plaintiff also shows that as provided by Rule 26(a)(2)(B), the fee schedules, Curriculum Vitae, list of publications and list of deposition and trial testimony of Ms. Willard and Dr. Coston are also attached to their reports.

Plaintiff has not obtained Rule 26 reports from his treating physicians as it is Plaintiff’s understanding from the language of Rule 26(a)(2) and the case law interpreting that rule that no such reports are required for such witnesses.

However, in the interest of full disclosure, Plaintiff's treating physicians, none of whom were retained or selected by Plaintiff's counsel, are expected to provide testimony concerning Plaintiff's medical care and treatment, as well as concerning their opinions about the cause and extent of his injuries, his prognosis and need for future medical, personal and rehabilitative care, and also pertaining to such other matters as may be attendant thereto. All such testimony is expected to be based upon the education, training and experience of Plaintiff's treating physicians, as well as the knowledge they acquired during the course of their treatment of Plaintiff.

This 4th day of December, 2008.

### **REHABILITATION AND LIFE CARE PLAN**

#### **Demographic/Identifying Information:**

Name: Scott Vincent  
DOB: 11/21/77  
DOI: 6/12/06  
Primary  
Disability: Spinal cord injury – C4 ASIA-A

#### **Referral Information:**

Scott Vincent, 31, was referred for rehabilitation assessment and appropriate rehabilitation planning by his attorney, Mr. Kenneth L. Royal, Esquire. Scott was evaluated in his home in Aiken, South Carolina and consultation was requested of his rehabilitation physician, Dr. Pamela Salazar. Given the severe and permanent nature of Mr. Vincent's injuries, medical recovery is not anticipated. Mr. Vincent's Plan is developed to provide the services and interventions Mr. Vincent needs to achieve maximum functioning and wellness. It is recognized that medical complications will occur. With enactment of Mr. Vincent's Rehabilitation and Life Care Plan it is felt that the frequency and severity of complications may be minimized.

#### **Medical Records:**

Medical records indicate that Scott Vincent was 27 years of age when injured in a motor vehicle accident with rollover. It was noted at Erlanger Health Care System that Mr. Vincent was a restrained passenger in an automobile crash with prolonged extrication. He was diagnosed at Erlanger Health System with a C4 spinal cord injury. A two-level cervical vertebrectomy with internal fixation was performed on 6/14/06. Mr. Vincent was discharged on 6/23/06 to Roger C. Peace Rehabilitation Hospital. Dr. Harold Tsai diagnosed neurogenic bladder and the

**Rehabilitation and Life Care Plan**

**Scott Vincent**

**December 1, 2008**

**Page 2 of 8**

patient was started on intermittent catheterizations. Mr. Vincent was inpatient at Roger C. Peace Rehabilitation Hospital until 9/1/06. He did require acute care hospitalization during his rehab stay for marked cervical retrolisthesis at C5 – C6 and required posterior stabilization from C3 through C7. Mr. Vincent developed deep vein thrombosis and also required Greenfield filter placement. His bladder was judged to be flaccid. He underwent surgery on 8/29/06 for placement of a suprapubic tube. At discharge from Roger C. Peace Rehab Hospital (9/1/06) Mr. Vincent was released to home in Aiken, South Carolina with follow-up in Augusta, Georgia at Walton Rehabilitation.

Mr. Vincent was evaluated by Dr. Pamela Salazar at Walton Rehabilitation Hospital on 9/12/06. Dr. Salazar diagnosed C4 tetraplegia, ASIA-A. Dr. Salazar noted medications to include Zanaflex, Baclofen, Zantac, Paxil, Claritin, Trazodone, Ditropan, Colace, Senokot, Dulcolax suppositories, Valium, and Aspirin. It was also noted that Mr. Vincent had no active movement below his shoulders. Dr. Salazar recommended Dr. Gerald Gordon for internal medicine follow-up and Dr. Jonathan Anderson for urological care in Aiken, South Carolina. Clonidine was prescribed for blood pressure greater than 180 systolically or severe headaches. It was also recommended that Mr. Vincent undergo a Baclofen pump trial to facilitate control of his severe spasticity.

Dr. Gordon did begin treating Mr. Vincent on 9/15/06 and his initial impression was that Mr. Vincent had a urinary tract infection and quadriplegia. Dr. Richard Eisenberg performed an EEG for Mr. Vincent on 9/22/06 and noted no epileptiform discharges. Dr. Charles Bean saw Mr. Vincent on 9/25/06 for urological consult and again urinary tract infection was noted with bladder spasms. Renal ultrasound was recommended. Dr. Bean also noted bladder stones in July 2007 as well as autonomic dysreflexia event. A cystoscopy was performed on 8/9/07 with removal of bladder stones and bladder biopsy was performed as well as changing of the suprapubic tube. It was recommended that irrigation increase and it was also noted that Mr. Vincent had chronic shoulder pain.

**Rehabilitation and Life Care Plan**

**Scott Vincent**

**December 1, 2008**

**Page 3 of 8**

Dr. Gerald Gordon saw Mr. Vincent in office on 10/14/07 for left leg edema up to the thigh. There was noted to be a clot in the deep femoral vessel and patient was given subcutaneous Levonox. It was noted that the patient had received a Baclofen pump and had stones removed from his bladder. Dr. Gordon diagnosed depression, peripheral neuropathic disease, deep vein thrombosis on the left and quadriplegia C3 – C4.

Dr. Jonathan Anderson evaluated Mr. Vincent's urinary status in October 2007. He did indicate neurogenic bladder, cystitis and a history of bladder stones. The recurrent cystitis was determined and cultures and continuing antibiotics were recommended with return to clinic in three months.

Mr. Vincent continued to follow-up with Dr. Pamela Salazar. In November 2007 Dr. Salazar noted that the patient was being provided with increased attendant care hours. She reported continued chronic neck and shoulder pain and that the patient was receiving in-home occupational therapy one hour per week. Dr. Salazar was continuing to refill Mr. Vincent's Baclofen pump. In January 2008 Mr. Vincent in follow-up with Augusta Rehabilitation Associates complained of neck and shoulder pain which was reported as severe. The patient could not operate the motorized wheelchair with upper extremity control and required head control. Medications were changed to include a trial of Skelaxin. In March 2008 Dr. Charles Bean noted bladder stones, blood in the urine as well as sedimentation and a neurogenic bladder. CT scan was scheduled to rule out enlarged stones. Dr. Gordon noted on March 14, 2008 that Mr. Vincent had recurrent urinary tract infections, kidney stones and bladder stones. A cystoscopy was required on 3/14/08 with retrograde pyelogram, right ureteroscopy and stone manipulation as well as right stent placement. Mr. Vincent was in Aiken Regional Hospital from 3/14/08 through 3/19/08.

Mr. Vincent underwent a CT scan of the abdomen on 7/9/08 which demonstrated a right posterior lower lobe pulmonary nodule as well as right-sided nephrolithiasis with urethral stent in place. Dr. Jonathan Anderson did indicate that Mr. Vincent was diagnosed with urosepsis and he was admitted to Aiken Regional Medical Center on 8/25/08. Diagnoses included sepsis,

Rehabilitation and Life Care Plan  
Scott Vincent  
December 1, 2008  
Page 4 of 8

urosepsis likely, MRSA, quadriplegia with spasticity, a remote stone and depression. The stone was again removed and the stent was again placed. Mr. Vincent was again discharged to home on 8/30/08.

Mr. Vincent has not been rehospitalized since that date.

**Current Functioning:**

On August 12, 2008 in-home occupational therapy noted that Mr. Vincent was able to exercise with 1 ½ pounds of weight on his left upper extremity and 3 pounds of weight on his right upper extremity for 20 repetitions with several short rest periods. It was noted that Mr. Vincent was able to use his right hand to turn his power wheelchair on/off. Mr. Vincent does not have control of his hands or wrists but does have gross movements of his upper extremities. He cannot grasp, pinch, or manipulate objects with his hands. When in bed Mr. Vincent's upper extremities are pulled by spasticity into flex positions over his head. While in bed Mr. Vincent is not able to independently move his arms. When up in his wheelchair he can advance the chair with head controls but cannot control his upper extremities to successfully use a joystick. Mr. Vincent is dependent on others for grooming, feeding, dressing and toileting. He does continue his suprapubic catheter which is currently changed on a weekly basis. He also receives continuing occupational therapy.

Mr. Vincent's currently receives 56 hours a week of attendant care from the Head and Spinal Cord Injury Association of South Carolina through his Medicaid. CNAs are provided from 6:30 a.m. to either 4:00 or 6:00 p.m. depending upon the week day. Weekends and evening hours require the services of Mr. Vincent's mother, step-father or father. All three parents work outside the home as well as care for their son.

Mr. Vincent indicates that his greatest trouble at this time is pain in his neck and inability to utilize his upper extremities for functional activities. He is also bothered by dysreflexia generally triggered by urinary tract infections, bladder or kidney stones or, possibly, pain.

Rehabilitation and Life Care Plan  
Scott Vincent  
December 1, 2008  
Page 5 of 8

Mr. Vincent does use an abdominal binder, multi-podus boots and TED hose in an attempt to manage his blood pressure.

Mr. Vincent indicates that his goals are to not rely on his parents for care, to decrease the pain in his neck, to self-feed, to utilize a joystick for wheelchair control and to engage in recreational fishing. Mr. Vincent's strengths are his attitude, willingness to work in rehabilitation, ability to cough and clear his own secretions, and a history of secretion management since injury. Complications post-injury have included ingrown toenails, urinary infections, dysreflexia, pain and an inability to weightbear.

Mr. Vincent does not have a generator for his home. He lives in a single-wide mobile home with two ramps and he sleeps in a hospital bed. The hospital bed is too small. Mr. Vincent is six feet, two inches in height and his weight is approximately 240 pounds. He reports a weight gain of approximately 40 pounds since injury. He is not engaging in any cardiovascular exercise.

Mr. Vincent does indicate a loss of memory since injury. He reports a loss of consciousness at the time of the automobile accident and some difficulty with concentration post-injury. He has not undergone neuropsychological testing. Post-injury he indicates that he sleeps a great deal, grinds his teeth and is unable to regulate his body temperature. He reports he is often chilled and he experiences needles and pins as well as a hot and cold feeling in his upper extremities. He reports that he cannot taste food as he did prior to injury and that he has some blurring of his vision. Mr. Vincent indicates he becomes dysreflexic about once a month. He denies a sensation below the nipple line and he has no movement distal to this level. Mr. Vincent is totally dependent upon others for bed mobility, transfers and transportation. He does indicate that he has a 1995 Dodge Van with a Braun One-arm Lift. He does not have wheelchair tie-downs or a raised roof for his van and reports that he must be reclined in his wheelchair to get in the van. Mr. Vincent rarely leaves home and denies recreational travel. He does have a roll-in shower in the single-wide mobile home which is partially modified. He does have a shower chair and hand-held shower head.

Rehabilitation and Life Care Plan  
Scott Vincent  
December 1, 2008  
Page 6 of 8

**Social, Vocational and Educational Data:**

Mr. Scott Vincent is 31 years of age. He was married at the time of the automobile accident and his estranged wife, Candice, was the driver of the vehicle. This couple has been married six years, however divorce is pending. The couple's daughter, Courtney (age 2), visits her dad one day a week when Mr. Vincent's mother, Debbie Thomas, is present. Mrs. Thomas indicates that the grandchild is able to crawl up in bed with her father and knows to touch his head and face so that he can feel her presence. Mr. Vincent reports that his daughter's visits are very important to him. He would like to be able to attend school and social events important to his daughter throughout her life.

Mr. Vincent reports a 9<sup>th</sup> grade education. He indicates that he dropped out of high school when his parents were divorcing and entered work in the construction fields at age 17. He reported special education services in middle school in reading. Vocational skills for Mr. Vincent were developed on the job and he indicates that he had two years experience with Coffee Construction and a history of self-employment in house trimming. At the time of the injury Mr. Vincent was anticipating full-time work in carpentry with financial backing from Mr. Giancroce. He anticipated making \$27.50 an hour in construction. Mr. Vincent is able to describe his carpentry work as very skilled in trimming new housing construction and remodeling existing housing.

For vocational purposes, Mr. Vincent should be considered totally disabled. Neither a return to work nor vocational rehabilitation is thought to yield Mr. Vincent future earned wages.

**Rehabilitation Planning:**

Mr. Scott Vincent is a good candidate for evaluation of tendon transfers. Dr. Pamela Salazar concurs that a referral to The Shepherd Center in Atlanta, Georgia would give Mr. Vincent opportunity for not only tendon transfer evaluation but also assistive technology training. The goals of both tendon transfers and technology training would be to give Mr. Vincent greater control of his environment. It is hoped that Mr. Vincent would be able to operate his wheelchair with joystick (T-bar). This would lessen the aggravation to his neck with head control of his

Rehabilitation and Life Care Plan

Scott Vincent

December 1, 2008

Page 7 of 8

wheelchair and also improve accuracy in mobility. Improved self-esteem in community travel may be achieved with hand controls.

A tendon transfer would not return Mr. Vincent's ability to grasp or lift with hand involvement. He may, however, achieve some level of pinch between the thumb and first finger. He is able at this time to demonstrate some thumb movement and greater control may be achieved with tendon transfer. Additionally tendon transfers may improve Mr. Vincent's wrist control and thereby give him greater success in modified self-feeding (with universal cuff/splint). While these gains are modest, they would be very significant for Mr. Vincent.

Technology training and the acquisition of appropriate electronic tools may allow Mr. Vincent to access a computer, get on the internet, turn on a fan, answer a phone, have a private telephone conversation, and possibly control his hospital bed. Changing positions in bed is not possible for Mr. Vincent. With electronic control of his bed he may be able to raise his feet, raise his head or lower the bed itself. Voice activation control of his television may allow him to turn on his television and turn it off at his discretion. The Shepherd Center in Atlanta, Georgia maintains a comprehensive assistive technology floor with all relevant equipment for spinal cord injured individuals. It is recommended that Mr. Vincent get assessment in this facility as well as appropriate training.

Mr. Vincent is currently receiving Medicaid which is paying for 56 hours a week of CNA care as well as nursing for Coumadin management and suprapubic tube changes. If Mr. Vincent should not be found eligible for Medicaid in the future, he will not have access to these services.

Mr. Vincent is hopeful that his parents and step-father may be relieved of caring for him. This client does require 24/7 nursing care. With additional training on medication management, skin integrity assessment and preventative measures Mr. Vincent may be successful in directing his care. At this time he is dependent upon others to know his medication dosages and his wellness program. Additional education is required following a neuropsychological examination. With the ability to direct his own care Mr. Vincent may be attended by CNAs with RN supervision.

Rehabilitation and Life Care Plan

Scott Vincent

December 1, 2008

Page 8 of 8

Mr. Vincent may live in Augusta for greater social and recreational support at Harison Heights. He would require his own nursing care at Harison Heights but would be provided social and recreational activities with others who have severe disability. Mr. Vincent, in Augusta, would be able to participate in a group with other spinal cord injured men to achieve exercise in a modified wellness program. Medical stability and emotional health will be enhanced through interaction with others.

Mr. Vincent will need to follow-up with Doctors Salazar, Gordon, Crawford, Bean/Anderson and Haas as indicated on Mr. Vincent's Rehabilitation and Life Care Plan. It should be noted that Mr. Vincent's Rehabilitation and Life Care Plan indicates the minimal services required based on Mr. Vincent's permanent spinal cord injury. Changes in health status, advances in the treatment of spinal cord injury or adjustments to medications will add additional services and interventions not identified on this Plan. Mr. Vincent's Rehabilitation and Life Care Plan should be considered the minimal services recommended for Mr. Scott Vincent.

A handwritten signature in cursive script, reading "Kathy W. Willard".

Tracy Hiett, RN, CRRN, CCM **PROFESSIONAL SERVICES AGREEMENT****Kenneth L. Royal, Attorney for Scott Vincent,**

(hereinafter referred to as "Client"), hereby contracts with **Willard Rehabilitation, Inc.** (hereinafter "**Willard Rehab**") to provide rehabilitation and life care planning services at the hourly rate of **Two Hundred Twenty-Five Dollars**. Deposition or Testimony shall be at the hourly rate of **Two Hundred Twenty-Five Dollars**.

**Royal & Vaughan, P.C.** shall be responsible for the payment of charges for services rendered by **Willard Rehab** to client and for all expenses incurred in connection therewith and shall pay said charges promptly upon receipt of billing. It is understood and agreed that failure by **Royal & Vaughan, P.C.** to pay for services or expenses within thirty days of billing shall authorize **Willard Rehab** to terminate additional services. It is understood and acknowledged that any balance due and owing beyond sixty days from the billing date shall bear interest at the rate of one and one-half percent per month or eighteen percent per annum. It is further understood and agreed that travel expenses may be requested in advance of travel and that neither reports nor testimony will be provided unless payment to **Willard Rehab** is current.

Any other services distinct from those provided herein, e.g., physician's services, occupational therapy services or evaluation, and physical therapy services or evaluations are not included in the agreement.

Dated this 4<sup>th</sup> day of November, 2008.

-

TABLE IMr. Scott W. VincentGENERAL INFORMATION AND ASSUMPTIONSUSED IN APPRAISAL COMPUTATIONSMr. Scott W. Vincent

Date of Birth -	November 27, 1977
Date of Injury -	June 12, 2006
Age at Injury -	28.54 years
Years of Life Expectancy -	45.98 years <sup>1</sup>
Years of Working Life -	38.46 years
Age at Retirement -	67.00 years

Source: <sup>1</sup>Annuity Mortality Table for 1949, Ultimate.

EARNINGS:

At the time of the accident, Mr. Vincent was employed as a carpenter. He also did side jobs on weekends and in the evenings. He was able to earn \$200.00 to \$250.00 a day for these jobs, estimated at \$4,800.00 per year. For purposes of estimating the lost capacity to earn, estimated basic pay and earnings from side jobs was used.

---

**SUMMARY OF ASSUMPTIONS**

- (1) It was assumed that Mr. Scott W. Vincent's working life was 38.46 years based upon a retirement age of 67 years.
  - (2) It was assumed that Mr. Scott W. Vincent's average earnings would grow at 6% per year. The judgmental growth rate factor was based upon the following factors: (a) The history of wages in the United States has reflected an upward movement in average hourly earnings. (b) The history of consumer prices in the United States has shown a steady advance. Taking these factors into consideration, it is my opinion that the above per annum growth rate in earnings for Mr. Scott W. Vincent is reasonable and conservatively predictable.
  - (3) A 5% discount rate was selected.
-

TABLE IIMr. Scott W. VincentSUMMARY OF LOST EARNING CAPACITYAND HOUSEHOLD CONTRIBUTIONS**Past Losses:**Basic Earnings, Benefits and  
Household Contributions

\$132,028.73

Discounted at 5% to  
November 26, 2008**Projections:**

A.	Basic Earnings	\$1,927,035.13 <sup>1</sup>
B.	Employer Contributions to the Fringe Benefits Program	\$147,418.19 <sup>2</sup>
C.	Supplemental Income	\$205,550.41 <sup>3</sup>
D.	Economic Value of Lifetime Services	<u>\$144,357.48<sup>4</sup></u>

**TOTALS****\$2,556,389.94**Discounted Value of  
Economic Losses**\$2,556,389.94**<sup>1</sup>See Table III.<sup>2</sup>See Table IV.<sup>3</sup>See Table V.<sup>4</sup>See Table VI.

TABLE IIIMr. Scott W. VincentLOST FUTURE BASIC EARNINGSDiscounted at 5% to  
November 26, 2008Projected Earnings Based on  
Average Annual Earnings  
Increase of 6% per annum<sup>1</sup>\$1,927,035.13Discounted Value of Future  
Basic Income\$1,927,035.13

<sup>1</sup>In my opinion, future earnings should increase at an average annual earnings increase of 6% per annum. Therefore, the loss of future basic income would be \$1,927,035.13 discounted at 5% to November 26, 2008.

---

TABLE IVMr. Scott W. VincentLOST FUTURE EMPLOYER CONTRIBUTIONSTO FRINGE BENEFITS PROGRAMDiscounted at 5% to  
November 26, 2008Loss Based on a 6% Average  
Increase in Contributions<sup>1</sup>\$147,418.19Discounted Value of Diminished  
Employer Contributions to  
the Fringe Benefits Program\$147,418.19

<sup>1</sup>In my opinion, a conservative estimate of future fringe benefits would be 7.65 percent of the annual salary. Therefore, the diminished future employer contributions would be \$147,418.19 discounted at 5% to November 26, 2008.

---

TABLE VMr. Scott W. VincentLOST FUTURE EARNINGSSUPPLEMENTAL INCOMEDiscounted at 5% to  
November 26, 2008Projected Supplemental Income  
Based on an Average Annual  
Increase of 6%<sup>1</sup>\$205,550.41Discounted Value of Future  
Supplemental Income\$205,550.41

<sup>1</sup>In my opinion, future supplemental earnings should increase at an average annual rate of 6%. Therefore, the lost supplemental income would be \$205,550.41 discounted at 5% to November 26, 2008.

---

TABLE VIMr. Scott W. VincentESTIMATE OF THE VALUE OF  
LOST HOUSEHOLD SERVICES<sup>1</sup>Discounted at 5% to  
November 26, 2008Loss Based on a 6% Average  
Increase in Value of Services\$144,357.48Discounted Value of Lost  
Household Services\$144,357.48

<sup>1</sup>This estimate of lost household services was based on the current value of contributions estimated at \$3,065.00 per year.

---

Option II:                     **\$16,194,456.96**

---

CERTIFICATE

I hereby certify that I have personally made an appraisal of the lost earning capacity and the discounted value of the life care plan of Mr. Scott W. Vincent and that no important factors significantly affecting the value were knowingly overlooked or withheld. I have no present or contemplated future interest therein and the fee received for this assignment is in no way contingent on the value reported. I further certify that to the best of my knowledge and belief the statements and opinions contained herein are correct as set forth.
